Height: 4 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 6

Group/Class: Hybrid Tea Rose

**Description:**

A captivating rose for its novel silvery hues dusted with a hint of lavender; the sweet scent of the blooms is obvious and heavenly; this variety will give better size and color once established

**Ornamental Features**

Sterling Silver Rose features showy fragrant fully double silver flowers with lavender overtones at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color. The fruits are showy red hips displayed from early to late fall.

**Landscape Attributes**

Sterling Silver Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

5800 S Yellowstone Hwy
Idaho Falls, ID 83402
(208) 522-5247
www.mygardengeek.com

Sterling Silver Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

**Planting & Growing**

Sterling Silver Rose will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

This plant is not reliably hardy in most areas of east Idaho. Please contact us for more information.
