Height: 5 feet

Spread: 4 feet

Sunlight: ○

Hardiness Zone: 5

Group/Class: Hybrid Tea Rose

**Description:**

Deep passionate color will capture your heart with these beautifully formed blooms of deep plum rose; saturated in a rich sweet fragrance and framed with exceptional glossy floliage, this plant also exhibits high disease resistance

**Ornamental Features**

Lasting Love Rose features showy fragrant double ruby-red flowers with plum purple tips at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color. The fruits are showy red hips displayed in late fall.

**Landscape Attributes**

Lasting Love Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Lasting Love Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

5800 S Yellowstone Hwy

**Planting & Growing**

Lasting Love Rose will grow to be about 5 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

This plant is not reliably hardy in most areas of east Idaho. Please contact us for more information.
